

Dhaka, Bangladesh, 19-21 October 2026

Organized by Bangladesh Air Force and Civil Aviation Authority
Theme: 'Technology, Training and Teamwork: Creating a Future-Ready Safety Mindset'

Bangladesh Air Force (BAF), in collaboration with the **Civil Aviation Authority of Bangladesh (CAAB)**, is going to jointly organize the International Flight Safety Seminar-2026 (IFSS-2026) in Dhaka, Bangladesh. The seminar is scheduled to be held from **19 to 21 October 2026**. The objective of the seminar is to facilitate the sharing of knowledge, experiences and best practices in the field of flight safety among professionals from both military and civil aviation sectors. Participants will include representatives from home and abroad, including those from Maintenance and Repair Organizations (MROs), with a focus on enhancing aviation safety through mutual learning and collaboration.

The theme of IFSS-2026 is **'Technology, Training and Teamwork: Creating a Future-Ready Safety Mindset'**. With rapid advancements in technology, digitalization, and the integration of Artificial Intelligence (AI) in both operations and maintenance, modern aircraft are now capable of flying faster, further and with greater efficiency. However, such technological progression inevitably brings new and complex safety challenges. Addressing these challenges requires the adoption of advanced technological solutions, including enhanced data analytics, timely and accurate fault detection and the implementation of more interactive and inclusive safety programme management systems.

IFSS-2026 aims to serve as a platform for knowledge and experience sharing among global aviation stakeholders. The seminar will focus on how to effectively tackle evolving safety concerns by leveraging technological advancements, supported by robust training and collaborative teamwork.
